Inspired by a Google visit, I transitioned from law to software engineering. Recognizing financial limitations in starting a law practice, I pursued coding during COVID and amid the au pair exchange(U.S.A.) time. Now with more than four years taking deep courses, and with several real-world projects under my belt, I am specializing in React, Typescript, and Vite.js and I'm thrilled to launch a full-time software engineering career, ready to bring innovation and dedication to your team.
